POST : /api/v1/auth/register

The screenshot shows a REST client interface with a dark theme. At the top, the URL bar displays "http://localhost:8080/v1/api/auth/register". The main area is divided into two tabs: "Code" (selected) and "Details". Under the "Code" tab, there are two sections:

- "Request body": This section contains a JSON object representing the registration payload:

```

    }  
  }  
}
```
- "Response headers": This section is currently empty.

In the bottom right corner, there are two icons: one resembling a document or code icon, and another labeled "Download".
